Appendix B – Annual Project Priority List	

Foreword

The New York State (State) Environmental Facilities Corporation (EFC), with its partner the State Department of Environmental Conservation (DEC), is responsible for the operation and administration of New York's Clean Water State Revolving Fund (the CWSRF). The CWSRF allows EFC to provide interest-free or low-interest rate financing and additional subsidy, in the form of grants or principal forgiveness, to support a variety of eligible water quality improvement projects, including municipally owned treatment works projects, stormwater/nonpoint source projects and national estuary projects.

EFC similarly operates and administers the State's Drinking Water State Revolving Fund (the DWSRF), with its partner the State Department of Health (DOH), to finance drinking water infrastructure projects.

EFC has provided approximately \$18.2 billion in funding to support wastewater infrastructure projects since the inception of the Clean Water State Revolving Fund in 1990.

The United States Environmental Protection Agency (EPA) provides a Capitalization Grant to the State annually to further capitalize the CWSRF and DWSRF programs. EFC uses this federal money, along with the required 20% State match funds, to provide financial assistance for approved projects. As borrowers repay their financings, repayments of principal and interest earnings are recycled back into the CWSRF and DWSRF programs to finance new projects and allow the funds to “revolve” over time. In addition, EFC issues bonds to increase the capital available to fund projects in the CWSRF and DWSRF programs. EFC uses CWSRF and DWSRF assets for security on and repayment of its bonds.

Since the inception of the CWSRF program in 1990, EFC has provided approximately \$18.2 billion in funding to support clean water infrastructure projects. When combined with refinancings, EFC has provided nearly \$31 billion in financial assistance for CWSRF projects. EFC has provided more than \$5.3 billion to fund drinking water projects since the DWSRF began in 1996. When combined with refinancings, EFC has provided more than \$7.8 billion in financial assistance for DWSRF projects to improve drinking water in the State.

EFC administers the Green Innovation Grant Program (GIGP) with CWSRF additional subsidy in the form of grants. Other key State-funded programs administered by EFC that support both clean water and drinking water infrastructure projects include the Water Infrastructure Improvement (WIIA) Grants program and the Intermunicipal Water Grants (IMG) program as well as any other programs arising out of a federal infrastructure bill in the coming year.

The demand for EFC’s financial assistance remains high, due in part to the continued focus on water infrastructure issues, and because of the State’s \$4 billion investment in clean and drinking water infrastructure projects and water quality protection across New York. To date, WIIA grants have been awarded to 610 projects in support of nearly \$4.16 billion in infrastructure investment. For federal fiscal year (FFY) 2022, EFC expects to execute over \$1 billion in new money project financing agreements through the CWSRF and DWSRF programs.

2022 PROGRAM DATES

Date	Description
October 1, 2021	Effective Date of the 2022 IUP
March 1, 2022	Income survey deadline (if applicable)
March 1, 2022	Financing applications due for all projects
June 17, 2022	New project listing deadline for FFY 2023 IUP
August 2022	Draft FFY 2023 IUP issued
September 2022	Comments on Draft FFY 2023 IUP due
September 30, 2022	End of the 2022 IUP year

The Clean Water Needs Survey (CWNS) will begin in early 2022. EPA, in partnership with states, territories and the District of Columbia, conducts the CWNS every four years. The CWNS is a comprehensive assessment of the capital costs, known as needs, to meet the water quality goals of the CWA and address water quality and water quality related public health concerns. EPA documents national and state needs projected for the next 20 years in a Report to Congress used by Congress and state legislatures in their budgeting efforts.

This CWSRF Intended Use Plan (IUP), which covers FFY 2022, identifies clean water infrastructure projects that would require over \$3.4 billion in funding. EFC anticipates that it will be able to provide approximately \$1.3 billion in interest-free or subsidized financings, grants, and principal forgiveness, which would address about 40% of the identified demand. Projects that do not receive interest-free or subsidized financing may receive market-rate financing, which is typically at a more favorable rate than a borrower could obtain independent of EFC financing.

EFC provides an array of financial assistance options that make “one-stop shopping” possible for all phases of clean water infrastructure projects. Planning, design, and construction may be financed with a short-term financing from EFC, and affordable long-term financing is available when the project’s final costs have been determined. Section 6.1 of this IUP discusses these financing options in greater detail.

The IUP describes EFC’s processes and the parameters for financing eligible CWSRF projects. The table above summarizes important program dates for FFY 2022.

1. Introduction

The federal Water Pollution Control Act (Clean Water Act) requires the State to prepare a plan identifying the intended uses of the funds in the CWSRF and describing how those uses support the goals of the CWSRF. The State issues a Final IUP annually after a public review and comment period. The EPA must receive the Final IUP before it awards the Capitalization Grant to the State's CWSRF.

This IUP provides information about which projects are eligible for CWSRF financing, how the CWSRF works, the type of financial assistance available through the CWSRF, and the sources and uses of the CWSRF's funds. This IUP also provides links throughout to resources on EFC's website at <https://www.efc.ny.gov/cw-iup>.

The 2022 Draft IUP introduced the following CWSRF program concepts and revisions:

- [Financing application due date moved to March 1, 2022 \(Section 6.2\)](#)
- [Design documentation expectations are established \(Section 5\)](#)
- [Engineering Report Outline revisions for the New York State Flood Risk Management Guidance for Implementation of the Community Risk and Resiliency Act \(CRRRA\) \(Section 5.1\)](#)
- [Hardship Policy revisions to clarify environmental justice and extended term financing, identify how additional subsidy will be provided to Hardship projects, and transition to 2019 5-year American Community Survey data for Median Household Income \(MHI\), Family Poverty, and Population data. \(Section 6.1\)](#)
- [Mandatory State Revolving Fund Terms and Conditions \(SRF T&Cs\) replace the EFC Bid Packet \(Section 6.3\)](#)
- [Fees are added for refunding long-term leveraged financings \(Section 6.2\)](#)
- [Revisions to Clean Water State Revolving Fund program goals \(Section 9\)](#)

Infrastructure Investment By the Numbers

\$1B

New Project Financing Anticipated in 2022

610

Projects Supported by
Water Infrastructure Improvement Grants

2. Eligible Projects

EFC may provide CWSRF financial assistance for the planning, design and construction of the following types of eligible projects:

- a. Municipally-owned treatment works projects,** including:
 - New, expanded or rehabilitated wastewater treatment plants;
 - Sludge treatment and disposal facilities including biosolids reuse;
 - Collector, trunk and interceptor sewers;
 - Sewer rehabilitation and infiltration/inflow correction;
 - Combined sewer overflow (CSO) and sanitary sewer overflow (SSO) abatement;
 - Landfill leachate collection, storage and treatment;
 - Energy efficiency projects for publicly owned treatment works; and
 - Water efficiency projects that conserve or reuse water, as well as water loss reduction and prevention
- b. Stormwater/Non-Point Source (NPS) projects.** These projects may be publicly or privately-owned, and must be consistent with New York State's NPS Management Plan:
 - Green infrastructure projects that manage stormwater, such as constructed wetlands, bioretention, porous pavement, and green roofs;
 - Waterbody restoration, including stream bank stabilization, and erosion and sediment control;
 - Restoration of riparian vegetation, wetlands, and other water bodies;
 - Environmentally innovative projects that demonstrate new and/or innovative approaches to delivering services or managing water resources; and
 - Practices that manage, reduce, treat, or recapture stormwater or subsurface drainage water
- c. National Estuary Projects.** These may be municipal and non-municipal projects that support and implement EPA-approved National Estuary Conservation and Management Plans for the New York-New Jersey Harbor, Peconic Bay, and Long Island Sound Estuaries.
- d. Construction, repair, or replacement** of municipal and non-municipally owned, decentralized wastewater treatment systems that treat municipal wastewater or domestic sewage.

3. Project Priority Lists - Evaluation and Scoring

EFC scores each project pursuing CWSRF financial assistance using a project priority score system. Each project is categorized based on the applicant's population¹ or whether the applicant is a non-municipal entity. A project's rank relative to other projects in its category determines the type of financial assistance available for the project.

EFC determines the type of financial assistance eligible projects qualify for by following this process:

- Compiling a list of the eligible projects from applicants that have expressed an intent to move forward with CWSRF financing in the coming year;
- Ranking those projects within each category on the Annual Project Priority List based on project score;
- Comparing the list to the amount of funds EFC can commit to projects for the year;
- Establishing the Subsidy Line in certain categories to determine which projects may be eligible for subsidized financing in the FFY covered by the IUP (the IUP Period); and
- Establishing a Hardship Subsidy Line in certain categories to determine which projects may be eligible for interest-free financing (Hardship financing) in the IUP Period.

This evaluation and scoring process is described in more detail in the following Sections 3.1 through 3.4.

A project's rank relative to other projects in its category determines the type of financial assistance available for the project.

¹ Population used is that of a "municipality" as defined in 6 NYCRR 649, which includes any county, city, town, village, district corporation, county or town improvement district, Indian reservation wholly within New York State, any public benefit corporation or public authority established pursuant to the laws of New York or any agency of New York State which is empowered to construct and operate a project.

3.1. Multi-Year List and Annual List

The IUP contains two lists of eligible projects:

1. The Multi-Year Project Priority List (the Multi-Year List), included as Appendix A, identifies all projects for which applicants have expressed an interest in receiving CWSRF financial assistance. The Multi-Year List identifies projects alphabetically by applicant name, indicates whether a project is also included on the Annual List, which category it is in, and the project score.
2. The Annual Project Priority List (the Annual List), included as Appendix B, identifies projects that EFC may provide financial assistance to in the IUP Period. The Annual List is a subset of the Multi-Year List. The Annual List is divided into the project categories described in Section 3.3. It provides the applicant's name, project description, estimated project cost², State Pollutant Discharge Elimination System (SPDES) permit number, if applicable, and project score. The projects within each category are ranked in descending order of score. A project may receive financial assistance in the IUP Period only if it is on the Annual List.

See Section 4 for information about adding a project to these lists.

3.2. Project Score System

EFC scores CWSRF eligible projects in Categories A, B, C, D, and E using the criteria stated in 6 NYCRR § 649.13. These scoring criteria are available on [EFC's website](#). Projects that improve and restore water quality generally receive the highest scores; projects that protect water quality are considered a secondary priority.

EFC scores projects based on:

1. Existing Source – the existing conditions that contribute to the water quality problem;
2. Water Quality Improvement –
 - a. the DEC classification of the resource that will be improved, restored or protected based on the classification of the receiving waterbody;
 - b. the severity of impairment of the affected waterbody; and
 - c. the degree of improvement likely to result from completing the project;
4. Consistency with DEC-Approved Management Plans
5. Intergovernmental Needs – an obligation or mandate for the project required by an executed enforcement instrument or required by a SPDES permit to be undertaken
6. Financial Need based on MHI; and
7. Economic Need based on service provided to Empire Zones

GIGP Projects in Category G are scored using a separate scoring system that is discussed in Section 7.7.

A project's rank on the Annual List determines the likelihood that the project will be eligible for interest-free or subsidized financing in the IUP Period.

² "Project cost" includes all costs associated with the erection, building, acquisition, alteration, reconstruction, improvement, enlargement or extension of a project; the inspection and supervision thereof; and the engineering, architectural, legal, fiscal, and economic investigations and studies, surveys, design, plans, working drawings, specifications, procedures, and other actions necessary for the construction of the project.

The Subsidy Line is established in Categories A, B, and C on the Annual List to identify projects that may receive subsidized financing. Projects above the Subsidy Line are eligible for subsidized financing during the IUP Period.

A Hardship Subsidy Line is also established in Categories A and B. Projects above the Hardship Subsidy Line identified with an “H” notation may be considered for Hardship financing. Projects below the Subsidy Line without an “H” notation are not eligible for subsidized financing or Hardship financing in the IUP Period but may receive market-rate financing. Projects in Category D are eligible for Hardship financing. See Section 6 for more information about the types of financial assistance available from EFC.

To ensure that a project will have sufficient funds to complete construction, EFC adds 1000 points to the original project score when a short-term subsidized or Hardship financing agreement is executed, and an additional 1000 points, or 2000 points total, when a long-term subsidized or Hardship financing agreement is executed. EFC may commit financing to a large project in phases or segments over several years. When a project is financed in phases, the additional points are applied to all project phases. With the additional points, subsequent phases continue to be eligible to receive subsidized financing to complete the project. With any phased project, all phases of the project must be defined within one engineering report and the environmental review must be inclusive of all phases of the project.

3.3. Project Categories

The Annual List is divided into six categories. The categories are established in 6 NYCRR § 649.3, as follows:

Category A - Projects in municipalities where population is 3,500 or less.

Category B - Projects in municipalities where population is 3,501 through 2,000,000.

Category C - Projects in municipalities where population is more than 2,000,000.

Category D - Projects for which the municipality has received notification of eligibility for interest-free financing in accordance with the Hardship Policy and submitted an acceptable financing application.

Category E - Non-municipally owned projects.

Category G - GIGP and ISC projects that meet EPA’s Green Project Reserve criteria (see Section 7.7).

Municipal population is based on population data from the 2019 American Community Survey’s five-year estimates.

3.4. Project Bypass

EFC may bypass a project on the Annual List when EFC determines the project is not ready to execute a project financing agreement during the IUP Period. Examples of when a project is not ready include:

1. the applicant fails to submit an acceptable financing application by the March 1, 2022 application due date;
2. the project is delayed;
3. the project is withdrawn by the applicant; or
4. the applicant fails to submit critical items that are required to execute a project financing agreement.

EFC may re-allocate any bypassed funds to other projects, some of which may be ranked with a lower score on the Annual List. If EFC bypasses a project, financial assistance will be offered to those communities in Category D with an acceptable financing application before the funds are used to finance projects in any other category. If EFC bypasses a project, the project may be considered for financing in a subsequent IUP Period.

4. Project Listing and Project Updates

To list a project on the IUP, an applicant must submit project information through EFC's Project Listing and Update System (PLUS) (<https://plus.efc.ny.gov/PLUS/>), including:

1. contact information,
2. a general description of the project's scope,
3. a budget, and
4. a project schedule.

To receive the most accurate project score and ranking, applicants should upload any available documents such as engineering reports, consent orders, or project descriptions through PLUS.

For a project to be included on the Annual List, the applicant must submit an approvable engineering report and a Smart Growth Assessment Form. Projects without these documents will be on the Multi-Year list. See Section 5 for requirements related to project design documentation, including engineering reports and the Smart Growth Assessment Form.

EFC accepts new project listings on a continuous basis, but applicants must submit their project information through PLUS by June 17, 2022 to have their projects listed in the Draft IUP. WIIA applicants that are eligible to be considered for a grant and are also interested in CWSRF financing will be listed on the IUP, as applicable.

Applicants must update their project information annually using PLUS. This ensures that the Annual List remains current and contains projects that applicants desire to finance in the current IUP Period.

- Updates are NOT required on projects for which the applicant has submitted an acceptable financing application to EFC, executed a short-term financing agreement with EFC, or has been awarded a grant or principal forgiveness by EFC.
- If an applicant did not update a project by the end of the project listing and update period, which closed July 16, 2021, that project is not on the Annual List, and will not be eligible for CWSRF financial assistance during the 2022 IUP Period.
- If an applicant did not update their project information using PLUS for two consecutive years, EFC designated the project inactive, and it no longer appears in the IUP. To re-list the project on the IUP, the applicant must resubmit a project listing form through PLUS.

LOOKING AHEAD

Applicants must submit their project information through PLUS by **June 17, 2022** to have their projects listed in the 2023 Draft Intended Use Plan.

5. Design Documentation

Design documents include, but may not be limited to:

- engineering reports,
- Map, Plan, and Report³ documents,
- basis of design reports,
- plans, specifications, and addenda.

These documents define the project listed on the IUP and the scope of work to be financed.

5.1. Engineering Reports

To be considered approvable, engineering reports must conform to the Engineering Report Outline (the Outline) available on [EFC's website](#). The Outline, effective October 1, 2021, is revised to include New York State Flood Risk Management Guidance from August of 2020 that provides guidance to state agencies on consideration of flooding risk by applicants for projects involving new and substantially improved structures or repair of substantially damaged structures. A list of minimum requirements for inclusion on the Annual List has also been added to the Outline.

EFC will reject reports not in conformance with the Outline.

Projects with engineering reports dated September 2018 or earlier must submit a new or revised report that complies with the current Outline by the due date for new project listings (June 17, 2022) to be considered for the Annual List for the 2023 IUP. Projects defined by reports dated before September 2018 will be moved to the Multi-Year list for the 2023 IUP. Exceptions will be made for engineering reports already made eligible by EFC and for projects that have submitted an acceptable financing application. Please plan accordingly.

EFC will not begin review of an engineering

³ As required by OSC for special improvement district establishment.

Notice

The Engineering Report Outline has been revised.

report until an acceptable financing application is received.

CWSRF projects are subject to the State Smart Growth Public Infrastructure Policy Act (the Smart Growth Act). The Smart Growth Assessment Form is used to establish that the project, to the extent practicable, meets the criteria of the Smart Growth Act. The Smart Growth Assessment Form and guidance are included as an attachment to the Outline. A Smart Growth Assessment Form is required for a project to be on the Annual List.

5.2. Plans, Specifications, Basis of Design Reports, and Addenda

All plan sheets, the cover of each specification book, and all addenda must be prepared, signed, and stamped by a qualified professional licensed to practice in New York State. At the time of submission, plans and specifications must be final contract documents ready to be issued for solicitation. A cost estimate on the submitted contract documents must accompany the plans and specifications. Specifications must include the SRF T&Cs, project sign schematics, and other front-end contract conditions for EFC's review.

Effective October 1, 2022, contracts will not be funded if they are solicited before EFC or DEC issues technical approval of plans and specifications. Please plan accordingly.

6. Financing Terms and Financial Assistance

6.1. Financial Assistance

EFC works with applicants to identify the appropriate financial assistance option or options for a project, and EFC financing packages may include one or more of the funding options as outlined in this section. Subject to a credit review, the project score and construction schedule, EFC will determine the appropriate term and type of assistance that may be offered. EFC's financial assessment will include, but not be limited to, the project budget, municipal bond resolutions, annual financial reports to the Office of the State Comptroller, and other financial information.

6.2. Hardship Financing

Municipalities with fewer than 300,000 residents may qualify for up to \$20 million of interest-free Hardship financing based on median household income (MHI) and poverty level. Some municipalities may also qualify for additional subsidy in the form of principal forgiveness. Eligibility for Hardship financing or principal forgiveness is discussed in the Hardship Policy, available on [EFC's website](#). Revisions have been made to the Hardship Policy, effective October 1, 2021, to clarify Environmental Justice hardship eligibility and extended-term financing, and clarify that offers of additional subsidy will be in the form of principal forgiveness.

For FFY 2022, EFC is using MHI, population, and poverty data from the 2019 American Community Survey 5-year data, published by the US Census Bureau. In addition, the Hardship Policy includes regionally adjusted MHI thresholds for Hardship financing eligibility. A Hardship Subsidy Line is drawn on the Annual List in Categories A and B. Projects that may be

considered for Hardship financing are identified on the Annual List with an "H" notation. EFC sends letters notifying municipalities that they are eligible for Hardship financing.

EFC may offer, on a very limited basis and in EFC's sole discretion, extended term financing with a final maturity up to forty years for hardship recipients in certain cases. Extended term financing would be used to assist communities only where EFC determined an extended term would provide a significant benefit to the recipient. In most cases, hardship financings will continue to have a 30-year term.

6.3. Short-Term Financing

Short-term financing provides recipients with funding to design and construct CWSRF eligible projects. Each recipient of short-term financing will issue a grid note to EFC as evidence of their obligation to repay their short-term financing. A grid note, also known as a statutory installment note, allows the recipient to borrow only what they need during the term of the short-term financing, up to a stated maximum principal amount. Debt is incurred by the recipient as disbursements are made under the grid note.

Recipients other than municipalities or public benefit corporations will borrow through the short-term financing program by issuing a promissory note to EFC, secured in accordance with EFC's security requirements. EFC will provide a line of credit not to exceed the amount of the promissory note. Upon maturity, the note may be refinanced by EFC with a long-term SRF financing or may be financed with non-SRF funding.

A short-term financing will become due and payable upon 60 days' notice from EFC if the project is abandoned. Short-term financing cannot be used for advance refunding or for the refunding of long-term debt (bonds). Only current refinancings will be allowed (i.e., notes that are callable or have a maturity date less

than three months from the closing).

After project costs are known and programmatic requirements are satisfied, a short-term financing may be refinanced by EFC as part of the next available leveraged financing or as a direct long-term financing.

SHORT-TERM FINANCING

SHORT-TERM SUBSIDIZED FINANCING

Rate	Interest-free for half of eligible project costs or half of the Estimated Amount on the IUP, whichever is less, and market-rate for the balance.
Amount	The lesser of eligible project costs or the Estimated Amount on the IUP.
Qualifications	Project priority score must be above the Subsidy Line.
Fees	None.
Notes	May not be used to pre-finance awarded grants.

SHORT-TERM MARKET-RATE FINANCING (SMRF)

Rate	Municipal Market Data (MMD) AAA scale 1-year plus issuance costs.
Amount	The lesser of eligible project costs or the Estimated Amount on the IUP.
Qualifications	Projects with a priority score below the Subsidy Line, projects not eligible for subsidy, or non-municipal projects.
Fees	None.
Notes	EFC will not process financing applications for SMRF for projects with priority scores below 10 points.

SHORT- AND LONG-TERM FINANCING

HARDSHIP FINANCING

Rate	Interest-free.
Amount	Up to \$20 million of eligible project costs.
Qualifications	Applicants must qualify pursuant to the criteria set in the Hardship Policy .
Fees	None.
Notes	Restrictions apply. See Hardship Policy.

LONG-TERM FINANCING

LONG-TERM MARKET-RATE FINANCING (LEVERAGED)

Rate	Market rates based on EFC's bond rating.
Amount	The lesser of eligible project costs or the Estimated Amount on the IUP.
Qualifications	Projects with a priority score below the Subsidy Line, projects not eligible for subsidy, or non-municipal projects.
Fees	One-time fee of 1% of project costs financed with EFC. State Bond Issuance Charge applies.
Notes	Long-Term Market-Rate financings will be funded as leveraged financings at the applicable market rate. EFC, at its discretion, may refund individual series of EFC bonds to generate a net savings that may be passed along to recipients with outstanding bonds in those series. A fee will apply to all refundings, calculated as 2.5% of refunding savings.

LONG-TERM SUBSIDIZED FINANCING (LEVERAGED)

Rate	50% of Market rates based on EFC's bond rating.
Amount	The lesser of eligible project costs or the Estimated Amount on the IUP.
Qualifications	Project priority score must be above the Subsidy Line.
Fees	One-time fee of 1% of the project costs supported by bonds. State Bond Issuance Charge applies. Annual Administrative Fee of 0.25% calculated on outstanding balance.
Notes	EFC, at its discretion, may refund individual series of EFC bonds to generate a net savings that may be passed along to recipients with outstanding bonds in those series. A fee will apply to all refundings, calculated as 2.5% of refunding savings.

LONG-TERM FINANCING (DIRECT)

Rate	Market rates based on EFC's bond rating.
Amount	The lesser of eligible project costs or the Estimated Amount on the IUP.
Qualifications	Determined by EFC on a case-by-case basis after evaluation of the municipality's financing capacity and credit history.
Fees	Annual Administrative Fee of 0.25% calculated on outstanding balance.
Notes	None.

OTHER FINANCIAL ASSISTANCE PROGRAMS

BOND GUARANTEE

Subject to EFC evaluation and determination.

GREEN INNOVATION GRANT PROGRAM

Rate	Not applicable – Grant.
Amount	50% to 90% of eligible planning, design and construction costs.
Qualifications	Projects meet EPA Green Project Reserve criteria.
Fees	None.
Notes	Part of the Governor’s Consolidated Funding Application process. \$20 million available in the 2022 IUP Period. A match from state or local funds for the balance of the estimated project cost is required.

ENGINEERING PLANNING GRANT

Rate	Not applicable – Grant.
Amount	Up to \$100,000 for planning costs.
Qualifications	Municipalities must meet the criteria identified in the eligibility requirements outlined in the EPG program overview.
Fees	None.
Notes	Part of the Governor’s Consolidated Funding Application process. \$3 million available in the 2022 IUP Period. Engineering reports resulting from this program must follow the Engineering Report Outline.

6.4. Applications for Financial Assistance

A financing application must be submitted after an applicant's project is listed on the Annual List. Applications for hardship financing and subsidized financing are accepted on a continuous basis until March 1, 2022 for the 2022 IUP Period. Applications received after the due date may be postponed to the next IUP Period. Applicants with projects below the IUP Annual List Subsidy Lines may submit a financing application at any time if they are interested in receiving market-rate financing.

The following items must be completed before applying:

1. Adopt a bond resolution establishing the legal authority to issue debt for the project.
2. Assess the potential adverse environmental impacts of the project through the State Environmental Quality Review (SEQR) process in the manner prescribed by EFC, including the applicable State Historic Preservation Office (SHPO) review.
3. Applicable to towns and counties only: Establish or expand a sewer district, or increase the maximum amount to be expended for such district, and obtain Office of State Comptroller (OSC) approval, if required.

During development of a project financing agreement, the applicant must submit a project budget that has been updated within the prior six months. A project financing agreement can be executed when the recipient incurs reimbursable costs.

All financing applications submitted to EFC by the March 1, 2022 application due date and deemed acceptable will be considered for financial assistance through September

DEADLINE

Applications for hardship financing and subsidized financing are accepted on a continuous basis until **March 1, 2022** for the 2022 IUP Period.

30, 2023. Applications that were submitted prior to October 1, 2020 that have not been updated are considered inactive and will not be processed by EFC.

Applications for financing should be submitted well in advance of when funds are needed.

EFC recommends that applicants:

- access the financing application form on [EFC's website](#) and consult the guidance materials;
- contact EFC as early as possible in the application preparation process to ensure the proper documents are collected and forms are completed.

Applicants should submit the financing application and required documents using the Large File Submission Upload Form on EFC's website to transmit files to CWSRFApply@efc.ny.gov.

Hard copy applications may be submitted to the following address:

Public Finance Division
NYS Environmental Facilities Corporation
625 Broadway – 7th Floor
Albany, NY 12207-2997

Please call 518-402-6924 for assistance.

6.5. Programmatic Requirements

A recipient of CWSRF financial assistance and its contractors must comply with certain federal and State regulatory requirements, including:

- American Iron and Steel;
- Davis-Bacon and Related Acts federal wage rates;
- Equal Employment Opportunity;
- Program compliance with Minority- and Women-Owned Business Enterprise (MWBE) or Disadvantaged Business Enterprise (DBE).

NOTICE

The EFC bid packet is replaced by Mandatory State Revolving Fund Terms and Conditions starting November 1, 2021.

EFC also encourages all recipients to utilize Service Disabled Veteran Owned Businesses (SDVOBs).

The EFC bid packet is replaced by [Mandatory State Revolving Fund Terms and Conditions \(SRF T&Cs\)](#) starting November 1, 2021. These SRF T&Cs are available on EFC's website, and provide EFC's recipients and their contractors with required contract and subcontract language. Also available on EFC's website are forms, guidance materials and training videos for contractors and subcontractors.

All applicants must incorporate SRF T&Cs into all contracts for which the applicant is pursuing CWSRF financial assistance, including contracts entered into prior to application for CWSRF financing. Failure to adequately incorporate and carry out SRF T&Cs in any contract will result in the loss of CWSRF financial assistance for that contract.

Disbursements may be held on projects when the recipient does not respond satisfactorily to EFC's document collection request for documentation of compliance with programmatic requirements.

7. EFC Compliance with EPA Program Requirements (Assurances & Specific Proposals)

40 CFR § 35.3150 requires the State to provide assurances of the CWSRF program's compliance with certain federal requirements. The State's assurances are embodied in the Operating Agreement, dated as of November 21, 2017, between the DEC and the EPA (the Operating Agreement), which provides for the organization and administration of the State's CWSRF. The Federal Assistance ID Number is CS-360001 and CFDA number is 66.458.

7.1. Binding Commitments

The State will make binding commitments through execution of Project Finance Agreements or Grant Agreements with CWSRF recipients in a total amount equal to 120% of each Capitalization Grant payment within one year after receipt of the payment. If the State commits more than the required 120%, the EPA will recognize the cumulative value of the binding commitments, and the excess balance may be banked towards the binding commitment requirements of subsequent years.

7.2. Timely Use of Funds

The State will expend all funds in the CWSRF in an expeditious and timely manner.

7.3. Compliance with Federal Requirements (Equivalency Projects)

The amount of money in the CWSRF equal to the funds "directly made available" by the Capitalization Grant are considered federal funds, or federal financial assistance. Accordingly, treatment works projects with project costs totaling an amount equal to the Capitalization Grant must meet various federal regulatory requirements. These projects are considered "equivalency projects." EFC identifies on the Annual List the projects that may be used to meet this requirement with an "E" notation.

7.4. Environmental Review

Potential environmental impacts must be considered for projects receiving CWSRF financial assistance, in accordance with SEQR. This applies for all treatment works construction projects (Clean Water Act § 212), including NPS pollution control projects (Clean Water Act § 319) and estuary protection projects (Clean Water Act § 320) that are also treatment works projects.

7.5. State Match Funds and Anticipated Cash Draw Ratio

For FFY 2022, the State will use State General Fund appropriations to provide a 20% match to funds provided by the federal Capitalization Grant. The State will be using a cash draw ratio of 83.33% federal funds and 16.67% state funds. State match funds will be deposited in the CWSRF at the same time as Capitalization Grant funds are deposited in the CWSRF.

7.6. Transfer of Funds between SRF Programs

The Safe Drinking Water Act (SDWA) Amendments of 1996 authorized states to meet their most pressing funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other (Section 302 of Public Law 104-182). Transfers totaling \$82,443,933 were made from the CWSRF to the DWSRF between FFY 1997 through 2001. For FFY 2022, no additional transfers between the SRF programs are anticipated. Prior to any transfer of funds, the IUP would be amended to note the proposed transfer and the public would be provided the opportunity to comment.

7.7. Green Project Reserve (GPR)

Annual federal appropriations require that EFC use a portion of the Capitalization Grant to finance projects or aspects of projects that meet the EPA's Green Project Reserve (GPR) requirement. GPR projects must be eligible for CWSRF financing and:

1. address stormwater and wet weather issues through the use of green infrastructure;
2. promote energy efficiency;
3. promote water efficiency; or
4. use innovative approaches to managing water resources.

EFC encourages projects to incorporate all four categories of GPR into their CWSRF projects.

The FFY 2021 CWSRF Capitalization Grant GPR requirement is \$17,537,500. EFC intends to use a portion of the additional subsidy authorized from the FFY 2021 Capitalization Grant to fund GIGP. Projects funded through this program help meet the State's GPR requirement.

GIGP focuses additional subsidy in the form of grant towards innovative projects that meet the most recent (2012) EPA GPR Guidance. A GIGP Project is scored and selected based on the level to which the project:

- Addresses environmental justice issues
- Establishes or restores natural features, ecology and hydrology
- Implements measures that address climate change, including cooling the surrounding environment, mitigating urban heat islands, reducing air pollution, and reducing energy use
- Is likely to succeed based on project development at time of application
- Makes measurable improvements to or protects water quality, including applicant's proposal for generating water quality metrics
- Leverages additional resources through removing barriers to collaboration, developing new partnerships, utilizing staff, securing other funding and investments, and/or provides workforce development
- Plans for the long-term operation, maintenance, and water quality of the project
- Provides opportunities for the applicant to facilitate the transfer of new technologies, knowledge, and practices to other water quality issues and other regions of the State
- Spurs innovation in the area of green stormwater infrastructure, energy efficiency, or water efficiency through the development and/or adoption of new technologies

The remainder of the GPR requirement will be met with CWSRF projects funded from Categories A, B, C, and D that implement GPR practices. The list of projects used to meet the GPR requirement and their GPR allocations will be identified in future CWSRF Annual Reports.

GPR requirements for FFY 2022, if any, are unknown as of the date of this Final IUP.

8. Allocation, Sources and Uses of Funds

8.1. Sources and Uses

Table A identifies the estimated sources of funds for FFY 2022 and their uses. EFC expects to allocate approximately \$1.3 billion to new financings in FFY 2022 (Table B). This amount includes funds allocated to projects in the 2021 IUP that did not execute a project financing agreement in FFY 2021.

TABLE A – SOURCES AND USES OF SUBSIDIZED FINANCING⁴

ESTIMATED SOURCES OF FUNDS FOR FEDERAL FISCAL YEAR 2022 AS OF JUNE 1, 2021		PROPOSED USES OF FUNDS DURING FEDERAL FISCAL YEAR 2022	
Remaining Resources on October 1, 2021	Amount	Description	Amount
Funds for projects with Complete Applications	\$16,713,768	Projects in Category A, B & C (Long-Term Leveraged or Short-Term Financings)	\$460,196,012
Unused 2021 funds	\$160,424,348	Projects in Categories A, B, and D with Acceptable Applications in 2021	\$266,275,505
Equity returned from conversion to long-term leveraged financing	\$266,275,505	Projects in Category D	\$65,694,382
Subtotal – Remaining Resources on October 1, 2021:	\$443,413,621	Additional Subsidy for Category D (principal forgiveness)	\$18,580,477
Capitalization Grant from EPA ⁵	\$175,000,000	Projects in Category E	\$1,769,000
State Match for Capitalization Grant	\$35,000,000	Additional Subsidy for Category G - Green Innovation Grant Program (GIGP)	\$20,000,000
Repayments 10/1/21 – 9/30/22	\$540,568,773	Subtotal – Amount for Projects:	\$832,515,376
Investment Returns		Bond Debt Service	\$459,119,388
Taxable Municipal Bonds	\$26,718,024	Program Administration	\$11,300,000
Guaranteed Income Contracts	\$81,847,933	Subtotal – Bond Debt Service and Program Administration:	\$470,419,388
Interest Earnings	\$386,413	Total Proposed Uses of Funds During Federal Fiscal Year 2022:	\$1,302,934,764
Subtotal – Investment Returns:	\$108,952,370		
Total Estimated Sources of Funds for Federal Fiscal Year 2022 as of June 1, 2021:	\$1,302,934,764		

⁴ Amounts will differ from National Information Management System (NIMS) because the reporting periods are different.

⁵ Estimate

8.2. Allocation of Funds

To fund short-term direct and long-term direct financings this IUP Period, EFC will use:

- the Capitalization Grant and the State match;
- repayments on financings;
- recycled funds; and
- returns on investments.

EFC's leveraged long-term financings (subsidized and market-rate) will be funded with Corporation bond proceeds and/or other available proceeds under the revolving fund.

When EFC prepared this Final IUP, Congress had not yet enacted the budget for FFY 2022. The 2022 IUP assumes the 2022 Capitalization Grant to the State will be \$175 million. The enacted 2022 federal budget may differ. The following table identifies the allocation of project dollars for FFY 2022 using this assumption.

TABLE B – ALLOCATION OF PROJECT DOLLARS

TOTALS BY CATEGORY

Category	Category Subtotal (Annual List)	Category Subtotal/ Total List	Funds	Potential Loans and Grants
Category A	\$559,703,472	17.93%	\$82,513,145	\$165,026,290
Category B	\$1,354,268,089	43.40%	\$199,725,069	\$399,450,138
Category C	\$1,206,934,384	38.67%	\$177,957,798	\$355,915,596
Category D			\$84,274,859	\$84,274,859
Projects in Cat. A, B, and D with Acceptable Applications in 2021			\$266,275,505	\$327,795,640
Category E			\$1,769,000	\$1,769,000
Category G Green Innovation Grant Program			\$20,000,000	\$20,000,000
Total:			\$832,515,376	\$1,354,231,523

8.3. Use of Administrative Funds

Two main sources of funds support administrative expenses: a portion of the Capitalization Grant, the intended allotment of which is shown in Table A, and an annual administrative fee that is charged to long-term non-hardship borrowers. These fees are held in an account outside the CWSRF and are used to cover administrative expenses that may not be recovered from the Capitalization Grant.

Administrative fees consist of two components – program income and non-program income. The uses of program income earned during the grant period are subject to restrictions by EPA, while program income earned after the grant period and non-program income may be used to fund a variety of water quality activities.

As of August 2021, EFC estimates it will receive a total of approximately \$16.9 million from administrative fees in FFY 2022, consisting of about \$10.5 million in program income and \$6.4 million in non-program income.

In addition to covering administrative expenses, EFC funds certain water quality activities as permitted by EPA. EFC anticipates the following uses of administrative fees during the IUP Period: \$3 million for EPG; \$200,000 for the Excelsior Conservation Corps; \$70,000 for the Center for Clean Water Technology; and \$500,000 for Environmental Justice Value Engineering.

9. Program Goals

The State has the following short-term goals for the CWSRF in FFY 2022:

1. Commit FFY 2022 funds to projects that are ready to proceed with construction, or otherwise positioned to have funds disbursed quickly and steadily and advance both the environmental and economic goals of the State and the CWSRF to fund the highest priority water quality improvements as soon as needs arise.
2. Administer the CWSRF in conjunction with State grant programs in a manner that incentivizes communities to advance water quality projects to construction.
3. Work with Storm Mitigation Loan Program (SMLP) recipients to complete their resiliency projects as soon as practicable, but no later than the end of FFY 2022. SMLP recipients were funded from the Disaster Relief Appropriations Act, 2013 (DRAA).
4. Identify projects listed on the IUP that may meet the program priorities for OSG, including projects implementing long-term control plans for CSOs or SSOs.
5. Implement program changes that incentivize financed projects to proceed expeditiously with the construction of infrastructure so that their benefits may be realized as soon as practicable.

The State has the following long-term goals for the CWSRF program:

1. Implement a statewide Asset Management Program for municipal facilities that prioritizes infrastructure investment and fiscal planning to sustain valuable wastewater infrastructure. Working with DEC, EFC will be procuring engineering services to work with consulting engineers and municipalities selected from a pool of applicants to create their own individualized asset management programs using DEC's Asset Management Guidance. The feedback provided by the consulting engineers and municipalities selected will be incorporated into further guidance and training developed by New York State for use by municipalities. It is anticipated that future iterations of the statewide Asset Management Program would allow municipalities to select their own consulting engineers.
2. Implement EFC's financing programs in a manner that benefits the residents of Environmental Justice areas.
3. Reduce energy use at wastewater treatment plants by financing energy efficiency improvements, installation of renewable energy, and inflow and infiltration elimination that reduce the volume of wastewater treated.
4. Enhance the program to continue providing reduced interest rate financings and additional subsidy that encourage the repair, replacement, and upgrade of existing infrastructure and the construction of new point source, nonpoint source and estuary projects in order to improve, maintain, or protect water quality.
5. Provide financial assistance for projects that will protect groundwater, consistent with DEC's goal to prevent pollution and protect the State's groundwaters as a source of potable water supply.
6. Help recipients achieve and maintain compliance with Federal and State water quality standards and enforceable requirements of the Clean Water Act for the protection and enhancement of New York's water resources.
7. Promote the innovative use of green infrastructure to effectively manage stormwater and encourage the incorporation of green infrastructure practices into traditional gray infrastructure projects.
8. Continue to identify and increase meaningful opportunities for participation by minority- and women-owned business enterprises in projects that are supported with CWSRF financial assistance.

10. Public Comment

A notice regarding the availability of the Draft IUP and a request for comments was published in the ENB on September 15, 2021. Email notices were sent to applicants with projects listed in the IUP and other interested persons. EFC also made the Draft IUP available on EFC's website.

EFC hosted a webinar on Wednesday, September 22, 2021 to present an overview of the Draft 2022 IUP.

EFC received comments from the public regarding the Draft 2022 IUP until 5:00 pm on Friday, October 1, 2021.

During the public comment period, several applicants commented on their specific project listed in the Draft IUP. The project priority lists have been updated as necessary and each applicant has received a response to their written comment. Updates made to the project priority lists did not impact any other projects on the IUP.

EFC received several non-project specific comments from a total of two commenters. The following responses address these comments, which are paraphrased for clarity. Responses are in italics.

1. The IUP comment period should be at least 30 days. *EFC complies with the applicable federal and State requirements for public notice and comment on the CWSRF IUP.*
2. Chapter 9: Short-Term Program Goal #2: reads, "Administer the CWSRF in conjunction with State grant programs in a manner that incentivizes communities to advance water quality projects to construction." Please describe these incentives. *The EPG program provides grants to help municipalities pay for initial studies and engineering reports so they can be better prepared to seek CWSRF financing to construct their wastewater, sewer, and water quality projects. State water infrastructure improvement grants provide 25% of net project costs, up to a maximum grant of \$25 million and intermunicipal water grants provide 40% of net project costs up to a maximum grant of \$30 million. These grants can be used in conjunction with CWSRF funding to lower overall costs of infrastructure projects for communities, thereby spurring construction of certain projects that may not have been undertaken without the grant dollars. Please see EFC's website for more details on these grant programs.*
3. Long-Term Goal #1 sounds more like a program that will possibly generate a list of deficiencies that DEC will use to create mandated upgrades that turn into unfortunate 30-year loans. This is a top-down approach onto municipalities. The Asset Management Program needs to be a separate program whereby districts apply for it, like the EPG program, and are able to hire consultants on their own. Facilities are owned and operated by those that use them, and they should be the ones developing the scope of the allocated program. *The long-term goal regarding asset management has been revised to clarify the intent of the program, which is to work with selected engineering firms and volunteer municipalities to assist in the development of guidance and training that may be used by municipalities to adopt their own asset management plans, working with their engineering consultants.*

4. How does the EFC CWSRF program ‘identify and increase meaningful opportunities’ for participation for minority- and women-owned business enterprises as set forth in long-term goal #8? How is EFC continuing to update and assess these meaningful opportunities, such as in the areas where there are few opportunities to source MBE, WBE or SDVOB firms? EFC should consider providing more funds for the requirement, as the levied cost, goes on the user fee as a debt burden especially in rural areas. This requirement should be assessed based on opportunity and not a one size fits all approach. *All projects funded by the CWSRF and/or state grants must comply with applicable state and federal requirements related to MWBE and SDVOB participation opportunities. Contractors must document good faith efforts as defined in Executive Law Article 15. If firms are not available to perform under a specific contract appropriate adjustments may be made to the participation goals applicable to that contract.*
5. Consider providing a loan-process flow chart to aid municipal applicants. *EFC will consider developing a high-level process flow for the website. There is no one-size-fits-all project, and as such, EFC recommends that a municipality reach out early to their support team (bond counsel, engineer, fiscal advisor, local counsel), and EFC, to develop a schedule and plan that fits its unique project needs.*
6. Please add a list of cofunding grant opportunities to the IUP. *EFC is considering developing a cofunding reference section for the website.*
7. Please provide an explanation of the new financing strategies. *All of EFC’s financing options are described in Section 6 of this IUP and on EFC’s website.*
8. How is the IUP audited? *EFC is subject to annual programmatic and financial audits by state, federal, and third-party entities.*
9. Unused 2021 funds should be obligated to existing eligible projects. *Unused funds in any IUP Period become available to be used in the next IUP Period and are used to offer subsidized financing to projects listed above the subsidy line in the next IUP.*
10. What is the source of interest earnings in Table A? *These are earnings on investments with maturities less than one year. Investments are undertaken pursuant to our Investment Guidelines, which are enacted pursuant to State Law and are audited annually for compliance.*
11. The Hardship Policy was not available during the comment period on the Draft IUP. *Changes to the Hardship Policy were concisely described in the Draft IUP, as is required.*
12. Use NYS Real Property Service for property ownership and NYS Department of Tax and Finance income data together instead of the ACS data. *Although not always precise tools, the American Community Survey (ACS) data are the best information widely available as an indicator of current economic conditions. EFC is concerned that using the suggested alternative data would not adequately represent municipalities where multi-unit housing would cause a disconnect between the income of tenants in a dwelling and the income of the owner of the property. Additionally, the income of persons who own multiple tax parcels may be counted more than once.*

13. In the past the T&C were made a part of the contractual term of the agreements incorporated in construction or engineering agreements. The T&C are now incorporated in the borrower's agreement, as proposed in the IUP, making the municipality responsible for the deficiencies of the respective contractor. *The Project Financing Agreement between the EFC and the recipient has not changed. Recipients have always been responsible for compliance with all programmatic requirements. The SRF T&Cs are functionally equivalent to the former bid packet. SRF T&Cs are provided by EFC to make it easy for recipients to incorporate programmatic requirements into their contracts successfully, and to make it easy for prime contractors to include in their subcontracts. The recipient is responsible for managing their contractor as defined in the contract they hold with the contractor. That contract would define any remedies available to the recipient for the contractor's failure to follow programmatic requirements.*
14. There needs to be better coordination between state agencies that complement one another with shared documents and coordination reducing paperwork and reducing project costs. *Each state agency has different programmatic requirements that are generally related to the source of their funding. EFC coordinates with recipients and other agencies to resolve questions that arise as part of financing with the SRF, including questions related to varied requirements attached to different sources of state and federal funding.*
15. The Office of Community Renewal requires applicants to obtain a pre score to assist with potential funding eligibility. Apparently, EFC no longer provides a pre scoring opportunity to obtain preliminary engineering grants. *EFC scores projects that are listed through the Project Listing and Update System (PLUS) as described in the IUP.*

11. Amendments and Modification

EFC may amend the Final IUP to reflect significant project or program modifications during the IUP Period. Significant modifications to the IUP include changes in funding levels or program requirements. EFC will make such amendments only after publication of a notice in the Environmental Notice Bulletin (ENB) and opportunity for public comment. EFC will post any draft amendments on [EFC's website](#) during the public review and comment period, and will publish final amendments on EFC's website.

EFC may make minor modifications to the IUP after publication of a notice in the ENB and opportunity for public comment. Minor modifications to the IUP include changes that would not affect the overall funding levels or priorities, such as transferring projects on the Multi-Year List to the Annual List or adding new projects to the Annual List for market-rate financing. The Final IUP will be revised to reflect minor modifications after the 15-day public comment period is ended.

In situations where proposed changes to the Annual List could jeopardize access to subsidized financing to a small number of projects, rather than processing an amendment, EFC will communicate with each of the affected communities to solicit comments or concerns.

The current Annual List is maintained on [EFC's website](#).

DEFINITIONS

TABLE OF ABBREVIATIONS USED IN PROJECT DESCRIPTIONS AND PROJECT NUMBERING SYSTEM

Abbreviation	Definition
COMP	Composting or co-composting STP sludge, where municipality has not applied for DEC Title 7 assistance
COMP (TITLE 7)	Composting or co-composting STP sludge, where municipality has applied for DEC Title 7 assistance
COLL	Collector/sanitary sewers
CSO	Combined Sewer Overflow (control, treatment or conveyance)
EST	Estuary
EXP	Expansion or increase in capacity
FM	Force main
I/I CORR	Infiltration and inflow correction
IMP	Improvement
INT	Interceptor sewer
LF-CAP (TITLE 3)	Closure or capping of an inactive hazardous waste landfill, where municipality has applied for DEC Title 3 assistance
LF-CAP (TITLE 5)	Closure or capping of a solid waste landfill, where municipality has applied for DEC Title 5 assistance
LF-CAP (MSW)	Closure or capping of a solid waste landfill, where municipality has not applied for DEC Title 5 assistance
LF-GAS	Landfill gas collection and control systems up to the point of sale of the gas as a fuel or conversion to energy
LF-RECLAIM	Landfill closure by reclamation of site
LF-LCH	Landfill leachate collection, storage and treatment
MOD	Modification
NPS	Nonpoint source
ORF	Overflow retention facility

DEFINITIONS

TABLE OF ABBREVIATIONS (CONT.)

Abbreviation	Definition
OS	Outfall sewer
PS	Pump station
REBUILD	Major repairs and replacement of worn out facilities
REF	Refinance
REHAB	Rehabilitation
RELIEF SEW	Relief sewer
REMEDIATION	Remediation of contamination from leaking petroleum storage tanks or other municipal facilities
REPL	Replacement
SALT-STOR	Deicing materials storage facility
SAWS	Small alternative waste systems
SEP	Separation
SEW	Sewer
SSO	Sanitary sewer overflow (control, treatment or conveyance)
STMSEW	Storm sewer
STP	Sewage treatment plant/wastewater treatment plant
UP	Upgrading the treatment process level
WTP	Water treatment plant

CWSRF Project Number System (ex: C4-5863-01-00)

“C” designates a CWSRF project.

“4” designates the DEC Region.

“5863” is the current base number.

“01” is the current 2-digit project number.

“00” is the current phase or cost increase number.

Appendix A – Multi-Year Project Priority List

Project No.	Applicant Name	Project Description	Estimated Amount	2022 Need	Notes	SPDES No.*
C8-6413-02-01	Addison, Village of	[ISC1] Planning, design and construction of repairs to the collection system in areas identified as having excessive infiltration and inflow and construction of a phosphorus removal system at the WWTP to improve water quality in the Canisteo River.	\$225,450	\$0	W	NY0020320
C4-5402-14-03	Albany MWFA	[ISC2] Planning, design and construction of collection system improvements to protect water quality in the Hudson River.	\$500,000	\$500,000	W	NY0025747
C4-5402-15-01	Albany MWFA	[ISC1] Planning, design, and construction of collection system improvements to protect water quality in the Hudson River.	\$600,000	\$0	W	NY0025747
C7-6207-05-00	Binghamton, City of	[GIGP12] Planning, design, and construction of stormwater street trees and bioretention to improve water quality in the Chenango and Susquehanna Rivers.	\$330,000	\$330,000		NO SPDES
C2-9261-01-00	Bronx River Alliance	[GIGP11] Planning, design and construction of renaturalize a 3 mile section of the Bronx River by removing invasive plants and planting native riparian vegetation.	\$495,000	\$495,000		NO SPDES
C9-9262-01-00	Buffalo Niagara Waterkeeper	[GIGP11] Planning, design and construction of bio retention areas, an emergent wetland, and a living shoreline as part of the Ralph C. Wilson, Jr. Centennial Park project to enhance fish and wildlife habitat, ensure coastal resiliency, and improve water quality in the Niagara River and Lake Erie.	\$2,500,000	\$2,500,000		NO SPDES
C9-6602-29-00	Buffalo Sewer Authority	[GIGP12] Planning, design, and construction of green streets to renovate an environmental justice area and improve water quality in the Niagara River.	\$1,100,000	\$1,100,000		NO SPDES
C4-5444-03-00	Coeymans, Town of	[GIGP12] Planning, design, and construction of bioretention areas and stormwater street trees to alleviate flooding at the Landing Riverfront Park.	\$1,000,000	\$1,000,000		NO SPDES
C4-5404-04-02	Cohoes, City of	[GIGP12] Planning, design, and construction of wetlands along the Mohawk-Hudson Bike Trail to reduce combined sewer overflows and improve water quality in the Hudson River.	\$1,000,000	\$1,000,000		NO SPDES
C7-6275-05-01	Cortland, City of	[ISC1] Design and construction of a project to replace gravity and storm sewer on Clinton Avenue to improve the water quality of the Tioughnioga River.	\$391,716	\$0	W	NY0027561
C7-6275-07-01	Cortland, City of	[ISC1] The planning, design and construction of green infrastructure and drainage improvements in the Southside services area to improve water quality in the West Branch of the Tioughnioga River.	\$354,250	\$354,250	W	NY0027561
C6-6168-01-00	Diana, Town of	[GIGP12] Planning, design, and construction of water meters in Diana Water District No. 1 to comply with the Town's Water Withdrawal Permit.	\$150,000	\$150,000		NO SPDES

C Projects with acceptable finance applications eligible for subsidized financing in FFY 2021.
E Projects subject to additional Federal Requirements (per the EPA Capitalization Grant to NYS).
F Financing anticipated in 2021.
H Projects that may be eligible for hardship.
O Projects with existing hardship offers.

P Leveraged financing anticipated in the Fall of 2021.
W Projects split between two categories.
* SPDES permit numbers are included where applicable.
Bolded Projects have a short-term financing with EFC.

Project Category: G
(in descending order of score)

Project No.	Applicant Name	Project Description	Estimated Amount	2022 Need	Notes	SPDES No.*
C5-5604-01-00	Gloversville Water Works	[GIGP12] Planning, design, and construction of water meter upgrades with advanced metering infrastructure technology to reduce water loss.	\$850,000	\$850,000		NO SPDES
C5-5512-05-01	Lake Placid, Village of	[ISC1] Planning, design and construction of sanitary sewer replacement to maintain water quality in the Chubb River.	\$1,465,588	\$0	W	NY0022187
C6-6040-02-01	Mohawk, Village of	[ISC2] Planning, design, and construction of wastewater collection system improvements to protect water quality in the Hudson River.	\$923,500	\$923,500	W	No SPDES
C3-7332-11-02	Newburgh, City of	[GIGP12] Planning, design, and construction of bioretention and stormwater street trees to reduce runoff along Broadway.	\$800,000	\$800,000		NO SPDES
C7-6262-05-00	Norwich, City of	[GIGP12] Planning, design, and construction of water meter upgrades with advanced metering infrastructure technology to reduce water loss.	\$1,000,000	\$1,000,000		NO SPDES
C1-5122-07-01	Ocean Beach, Village of	[ISC1] Planning, design and construction for sanitary/storm sewer separation to reduce surcharging of sanitary sewers and WWTP during storm events.	\$800,000	\$800,000	W	NY0020168
C6-6070-08-17	Oneida County	[GIGP12] Planning, design, and construction of microturbines to utilize excess biogas and increase electricity production at the wastewater treatment plant.	\$1,250,000	\$1,250,000		NO SPDES
C8-6407-12-01	Ontario, Town of	[GIGP12] Planning, design, and construction of a cascade post aeration system to reduce energy consumption at the Town's wastewater treatment plant.	\$415,000	\$415,000		NO SPDES
C7-6344-02-00	Oswego, City of	[GIGP12] Planning, design, and construction of energy efficient blowers at the Eastside Wastewater Treatment Plant to provide a reduction in energy use and aid in plant efficiency.	\$1,000,000	\$1,000,000		NO SPDES
C3-7348-07-00	Poughkeepsie, City of	[GIGP12] Planning, design, and construction of rain gardens, bioretention, and trees in the Malcolm X pocket park to increase green space in an environmental justice area and improve water quality in the Fall Kill Creek and Hudson River.	\$355,000	\$355,000		NO SPDES
C4-5439-04-00	Ravena, Village of	[GIGP12] Planning, design, and construction of daylighting a portion of the Hannacroix Creek to improve waterquality in the creek and the Hudson River.	\$475,000	\$475,000		NO SPDES
C6-6037-17-01	Rome, City of	[GIGP12] Planning, design, and construction of a combined heat and power system and increasing the capacity of the anaerobic digesters at the County Wastewater Treatment Plant to aid the facility in producing enough biogas to achieve net-zero energy status.	\$2,000,000	\$2,000,000		NO SPDES
C5-7505-02-00	South Glens Falls, Village of	[GIGP12] Planning, design, and construction of an automatic meter reading system to increase water efficiency.	\$1,000,000	\$1,000,000		NO SPDES
